

NetAXS™

Connectivity. Flexibility. Performance.

NetAXS is the new hybrid access control panel that combines flexibility with powerful performance. Now you can easily program and manage your access control system using either an integrated Web-browser or traditional PC-based software. Because the new hybrid solution lets you choose the level of security and functionality your business requires, you won't need anything but NetAXS to make access control for your facility easier than ever before.

Whether you're installing a completely new system or upgrading an existing N-1000 panel, you'll find that NetAXS is completely adaptable and extremely user-friendly. It offers simple programming and operation that's ideal for users who are working with access control for the first time. Best of all, the standalone Web platform means you can manage your access control system from any browser, and you don't have to worry about operating systems or virus attacks.

Market Opportunities:

NetAXS is ideal for end users who want to manage their access control system using a Web browser, a PC, or a combination of both. It's perfect for small and medium-sized organizations such as:

- Commercial offices
- Light industrial and warehouses
- Day care centers, schools and universities
- Pharmacies, hospitals and medical offices
- Restaurants and convenience stores
- Retail establishments

CUSTOMER BENEFITS

- **Intuitive interface** – Choose communications via the Web or PC.
- **Low-cost solution** – Integrated enclosure keeps installation costs to a minimum.
- **Simple installation** – Pre-wired power and connectors let you hang it up, plug it in, and go. No other solution makes installation easier!

NetAXS Features:

- Next generation hardware lets you scale up or down depending on your requirements
- Built-in Ethernet functionality offers a faster processing and communications link
- The small enclosure extends the functionality of our popular N-1000 to ensure effortless upgrades
